

AMENDMENTS TO THE SPECIFICATION

Please amend the Specification by replacing the paragraph found on page 5, lines 22-32 with the following replacement paragraph:

In addition to prior art means, the system implementing the functions of the present invention and the network nodes of this system comprise means for providing a call state control function at least the mandatory CAMEL related information needed in the call state control function for CAMEL services. They may also comprise means for using the information when needed. More precisely, the network nodes comprise means for implementing the functionality described below. The current network nodes comprise processors and memory, which can be utilized in the functions according to the invention. All changes necessary for implementing the invention can be made as added or updated software routines, by means of application-specific integrated circuits (ASIC) and/or programmable circuits, such as EPLD, FPGA.
